Project: Revolv - Circular Commerce & SupplAi Engine

Date of Original Creation: 2024-2025

Declaration:

I, Laszlo Czako, am the original creator and inventor of Revolv - the world's first fully-integrated fractional resale and c

This document serves as formal notice of authorship, originality, and intellectual ownership of the following core innova

1. Fractional Resale Marketplace:

- Structured resale of partially used items.
- Dynamic pricing based on usage, condition, and supply.
- Co-ownership and micro-transaction logic embedded into the listing system.

2. SupplAi Engine:

- An AI assistant that categorizes, describes, and matches goods using photos, condition, and locality.
- Suggests shipping, pickup, or drop-off methods using live quote integrations.
- Organizes listings, bundles, and optimizes fractional packaging logic.

3. Real-Time Logistics & Visual Mapping:

- Smart quoting system using carrier APIs (Canada Post, UPS, etc.).
- Interactive map interface for buyers and sellers.
- Route optimization and container matching for fractional logistics.

4. Multi-Tier Ecosystem:

- Service layers for consumers, industrial sellers, and government.
- Verified accounts, anonymous listings, and subscription-based premium tools.

5. Circular Economy Infrastructure:

- Packaging partnerships for sustainable reuse.
- Scrap/resale/recycling layer tied to AI-suggested resale paths.
- Community-driven product reuse loops.

Ownership Confirmation:

This intellectual property was authored, documented, and timestamped in public repositories via GitHub and protected
